Web 2.0 Video

The Machine is Us/ing Us

http://www.youtube.com/watch?v=NlGopyXT_g

Background – Web 1.0

- Berners-Lee envisioned a read/write web
 - We weren't ready in the 1990's for such a big step
 - We started with a read-only web – a place where everyone could read whatever they wanted, but only a select few (programmers) could write web pages. This was Web 1.0.

Enter Web 2.0

- Web 2.0 or the Read/Write Web fulfills Berners-Lee's original vision for the WWW
- The introduction of tools like blogs, wikis, and RSS have made it so that anyone can write to the web
- Marketing term (derived from observing 'patterns') rather than technical standards - “an attitude

Web 2.0 is about...

Web 2.0

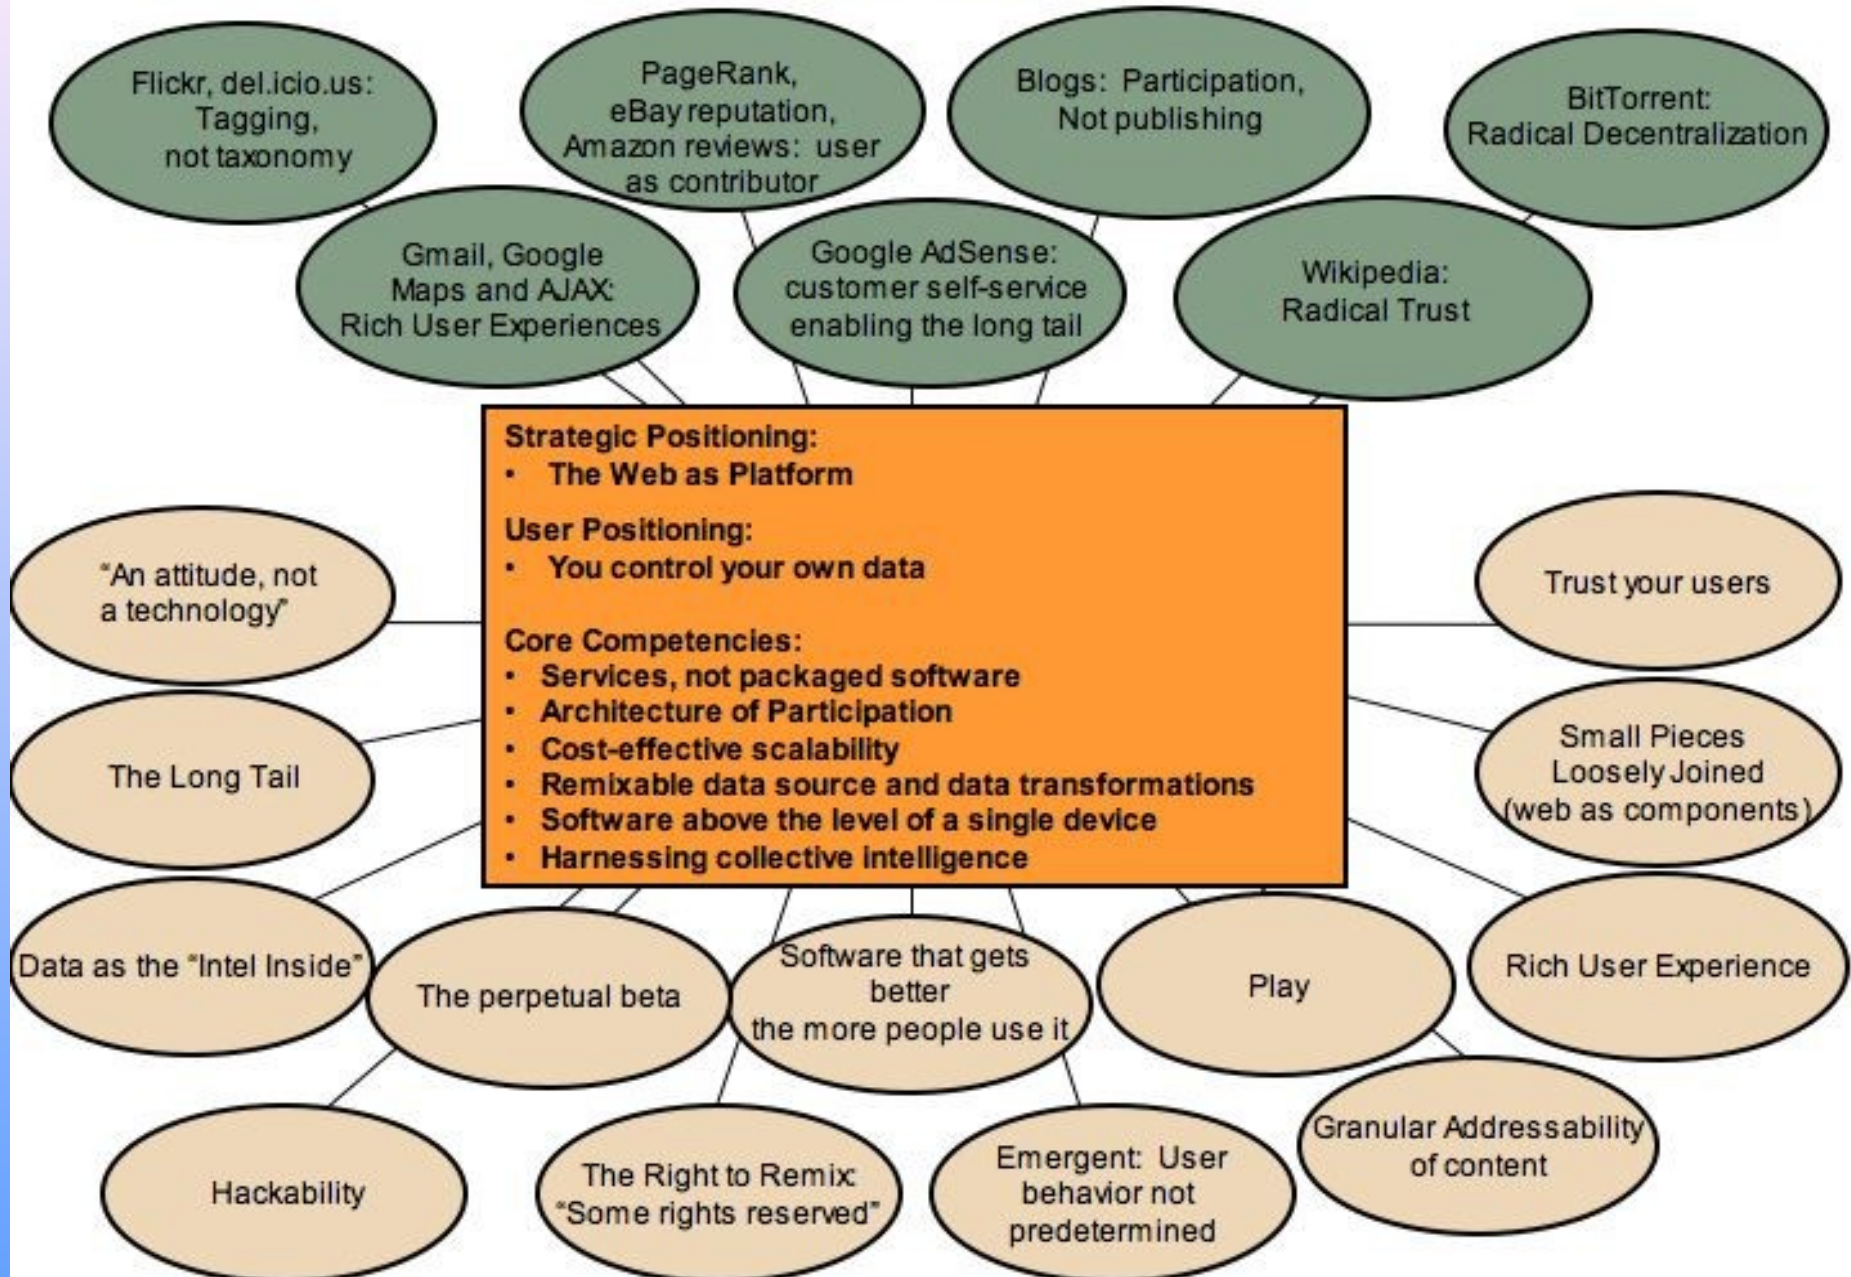

Web 2.0 is the **network as platform**, spanning all connected devices; Web 2.0 applications are those that make the most of the intrinsic advantages of that platform: delivering software as a **continually-updated service** that gets better the more people use it, **consuming and remixing data** from multiple sources, including individual users, while providing their own data and services in a form that allows remixing by others, creating network effects through an "**architecture of participation**," and going beyond the page metaphor of Web 1.0 to deliver **rich user experiences**.

Tim O'Reilly, "[Web 2.0: Compact Definition?](#)"

Characteristics of Web 2.0

- Network as platform
- Always beta
- Clean URIs
- Remix and mash-ups
 - Syndication (RSS)
- Architecture of participation
 - Blogs & Wikis
 - Social networking
 - Social tagging (folksonomies)
- Trust and openness

Web 2.0 Meme Map

Social Trends

- Spread of Broadband
 - Increasingly ubiquitous connections
- A generation of “web natives”
 - Living on the web
 - Social networking; blogging; instant messenger
- Create, not just consume
- Some hard lessons about data ownership
 - Don’t steal my data; don’t lock me in

Business Trends

- Exploit the Long Tail
 - At internet scale even niche communities are very large
 - “We sold more books today that we didn't sell at all yesterday, than we sold today of all the books that did sell yesterday.”
 - Amazon employee quoted on Wikipedia
- Success of web services
 - No need to own the user interface. It's your data that they want
 - Users can enrich your data
- “Harnessing collective intelligence of users”
 - Review and Recommend; Social Bookmarking; Folksonomies

Technology Trends

- The Power of XML
 - Easier to exchange and process application independent data
- Agile Engineering
 - Incrementally develop your product; short release cycles
 - Continually adapt to user needs
 - “The Perpetual Beta”
- Maturation of the browser
 - XHTML, DOM, CSS, Javascript. RIA
 - Browser as platform, not just document viewer

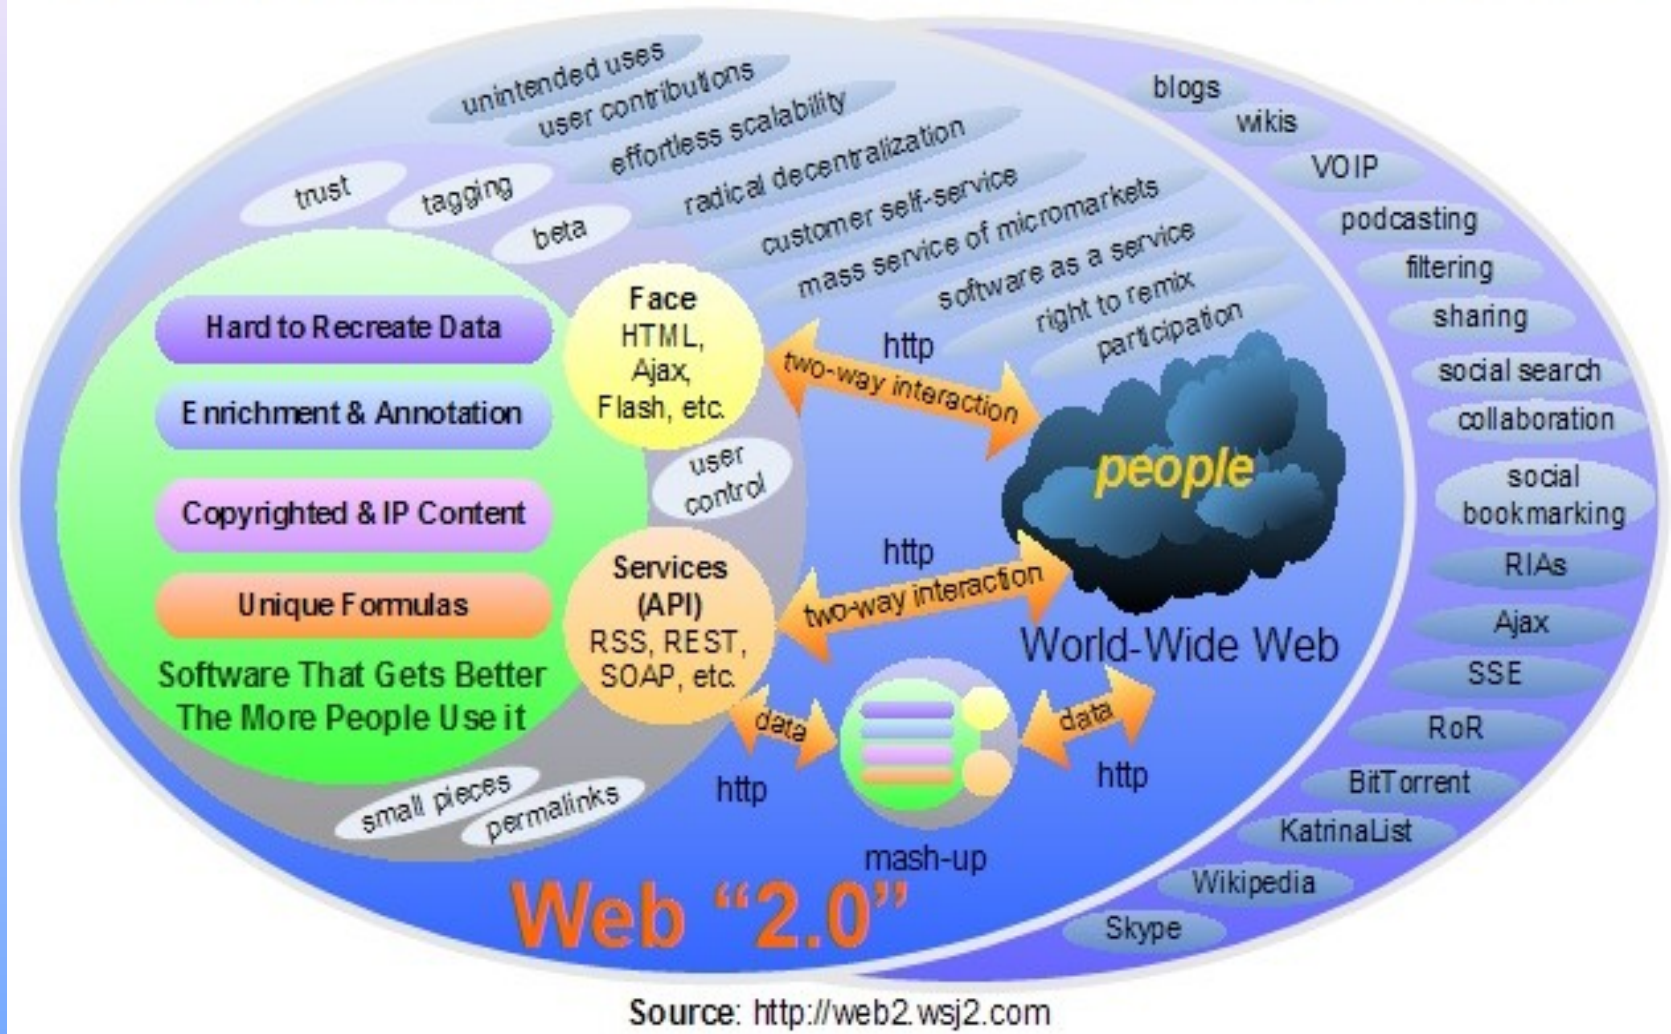

Security Trends [1]

- Changing rules
- Insecure development
- Mix of processing and data
- Users loading content
- Awareness to use security features

Security Trends [2]

- Cross-site scripting
 - Issues with AJAX
- RSS / ATOM feeds
- RIA
 - Thin becomes thick
- SaaS / ASPs / Outsourcing

Elements of the Web's Next Generation

Dion Hinchliffe, "Review of the Year's Best Web 2.0 Explanat

Web 2.0 Jo

Blogs

- Updated by one or more set authors
- Regularly updated
- Used for journal-like content
- Made up of posts
- Posts sorted reverse chronologically
- Sometimes allows for comments
- Updates delivered via RSS

Blogs

- Blogs – social phenomenon of the C21st?
- Need for information professionals to:
 - Understand Blogging & related technologies (e.g. RSS, Technorati)
 - Be able to find resources in the 'Bloggosphere'
 - Explore how to Blogs to support business functions (support users, staff & organization)

• Increasingly professional (e.g.

For Wikipedia's non-encyclopedic visitor introduction, please see *Wikipedia:About*.

Wikipedia (IPA: /ˌwɪkiˈpiːdi.ə/ or /ˌwɪkiˈpiːdi.ə/  [Audio \(U.S.\)](#) ^(help·info)) is a multilingual, web-based, free content encyclopedia project. Wikipedia is written collaboratively by *volunteers*; its articles can be edited by anyone with access to the web site. The name is a *portmanteau* of the words *wiki* (a type of collaborative website) and *encyclopedia*. Its primary servers are in Tampa, Florida, with additional servers in Amsterdam and Seoul.

Wikipedia was launched as the *English Wikipedia* on January 15, 2001, as a complement to *Nupedia*, an expert-written and now defunct encyclopedia. The project is now operated by the *Wikimedia Foundation*, a non-profit organization created by *Jimmy Wales* who is the co-founder of Wikipedia. ^{[2][3][4][5][6]}

Wikipedia has approximately seven million articles in 251 languages, ^[1] 1.7 million of which are in the English edition. It has steadily risen in popularity since its inception ^[7] and currently ranks among the top ten most-visited

Summing Up

- Web 2.0 hard to define, but very far from just hype
 - Culmination of a number of web trends
- Importance of Open Data
 - Allows communities to assemble unique tailored applications
- Importance of Users
 - Seek and create network effects
- Browser as Application Platform
 - Huge potential for new kinds of web applications

Collaborative Environment

- “Collaborative Intelligence Will Prevail Over Artificial Intelligence.”

- Scott Rafer, President & CEO of *Feedster*, Accelerating Change 2005 conference

- o “...letting people share preferences at such a scale, scope, level of detail, velocity, and frequency, that AI is rendered unnecessary to generate smartness, at least for the foreseeable future.”
